Prayagraj, Uttar Pradesh - 212109, India

PROFILE SUMMARY

Full Stack Software Engineer with 2+ years of experience in backend development using Java and Spring Boot, and frontend development with React.js. Proficient in GitHub for version control and AWS for cloud deployment. Experienced in building scalable, high-performance applications and quickly adapting to new technologies. Committed to delivering clean, efficient, and maintainable software solutions.

EXPERIENCE

- Reflexis System India Pvt. Ltd** November 2021 - March 2024
Software Engineer Pune, India
 - Developed and maintained backend services using Java and Spring boot, ensuring high availability and scalability, which boosted system performance by 30%.
 - Introduced a new API for data migration, which reduced migration time by 100% and enhanced data transfer efficiency.
 - Revision and modularization of old code bases to modern standards, reducing operating costs by 10% and improving functionality.
 - Reduced the bug rate in production by 25% through the implementation of rigorous unit and integration tests.
 - Automated build and deployment processes using Jenkins CI/CD pipelines, streamlining delivery workflows, and reducing release time by over 90%.
 - Created comprehensive documentation covering 50+ features and workflows, reducing new hire training time by over 30% and accelerating onboarding.
- Cognisite Technologies Private Limited** May 2021 - October 2021
Full Stack Developer Bengaluru, India
 - Participated in the development and maintenance of front-end and back-end modules for a construction management platform, enhancing performance and improving the overall user experience.
 - Assisted in designing and implementing RESTful APIs to support new features and streamline communication between system components, enabling smooth service integration.
 - Supported AWS-based application deployment, contributing to the resolution of 5+ infrastructure and performance issues, which improved system uptime and reliability.

EDUCATION

- IET MJP Rohilkhand University** August 2016 – November 2020
B.Tech in Electrical Engineering Bareilly, India
 - GPA: 7.59

PROJECTS

- Jobs Made Easy: Job Portal Website for recruiters and job seekers** 
Tools: React, SpringBoot, MySql
 - Designed and developed a full-stack job portal to streamline the recruitment process by matching job seekers with relevant job opportunities based on their qualifications.
 - Built a responsive front-end using React.js, providing an intuitive user interface for both recruiters and candidates.
 - Created a secure and scalable back-end with Spring Boot and RESTful APIs, that can handle over 10,000+ API requests/month for user, job, and application data.
 - Using MySQL to manage and query a relational database of 10,000+ records, including users, jobs, and applications.
 - Secured the platform using Spring Security, achieving compliance with role-based access 100% in the recruiter and candidate portals.
 - Enabled recruiters to post up to 50 jobs, view and filter applicant data, and update application statuses (Accepted/Rejected) with real-time feedback.
 - Provided job seekers with features to search, filter and apply to jobs, and track the live status of applications, increasing the visibility of the application by 75%.

SKILLS

- Programming Languages:** Java, JavaScript, C
- Web Technologies:** HTML5, CSS, JavaScript, React.js
- Database Systems:** DB2, MySQL, MongoDB
- Cloud Technologies:** AWS, GCP
- DevOps & Version Control :** Git, Jenkins, Docker
- Frameworks :** Spring, Hibernate, React.js

ADDITIONAL INFORMATION

Languages: English, Hindi
